Final Project Plan

- As I cannot expect any of my classmates to accommodate the Arabian Time Zone, this will be a solo project.
- For my culminating project in Data Visualization, I used one of the Human Rights Data Sets sent out by Dr. Durso. I would like to do so again, if possible. However, if none of the sets mesh with the chosen analysis method, I won't "shove the square peg" so to speak.
- Methods in descending order of preference: Response Surface Regression, Meta-Analysis & finally, K-Means clustering
